PROFESSIONAL SUMMARY

Cybersecurity undergraduate pursuing B.Tech in Computer Science (Cybersecurity) with hands-on experience in network monitoring, authentication security, LLM security, and applied machine learning. Demonstrated ability to build security platforms, LAN monitoring systems, and ML-based threat detection tools. Seeking an entry-level cybersecurity or IT role to apply technical skills in securing systems, networks, and digital assets.

TECHNICAL SKILLS

Programming Languages: Python, C, Java, C#

Web Technologies: HTML, CSS, JavaScript

Cybersecurity: Network Monitoring, Password Security, Authentication, Prompt Injection Defense, LLM Security

Security Tools & Labs: Kali Linux, Wireshark (Packet Analysis), Nmap (Network Scanning)

Frameworks & Tools: Flask, Machine Learning, NLP, Scikit-learn, Git

Concepts: IP Scanning, Network Protocols, Risk Scoring, Adversarial ML, Prompt Security

EXPERIENCE

IT Intern – LAN Monitoring System | Hindustan Aeronautics Limited (HAL), Avionics Division, Hyderabad

May 2025 – Jul 2025

- Developed a LAN monitoring system using C# (.NET) for enterprise-scale networks.
- Implemented ICMP ping and ARP-based IP scanning to identify and track active devices.
- Improved network visibility and security posture for HAL's avionics division infrastructure.

Research Intern – Machine Learning | IIT Guwahati

May 2024 – Jul 2024

- Conducted research on sentiment analysis of social media data using NLP techniques.
- Preprocessed text datasets, trained an SVM classifier, and achieved an F1-score of 0.94.

EDUCATION

B.Tech – Computer Science & Engineering (Cybersecurity) | DRK College of Engineering & Technology,

Hyderabad

2022 – Present

CGPA: 8.03 / 10

Intermediate – MPC (Class XII) | Narayana Junior College, Hyderabad

2019 – 2021

CGPA: 8.22 / 10

SSC (Class X) | Jawahar Model High School, Hyderabad

2018 – 2019

CGPA: 9.7 / 10

PROJECTS

LLM Attack Detection & Prompt Injection Defense Platform [Major Project]

Python | Machine Learning | NLP | Flask | Prompt Security | Cybersecurity

- Developed a security platform to detect and prevent prompt injection and jailbreak attacks targeting Large Language Models (LLMs).
- Implemented a machine learning-based risk scoring system to classify prompts as safe or malicious based on attack patterns.

- Designed a defense pipeline that analyses user prompts before forwarding to the LLM, reducing adversarial manipulation risk.
- Integrated prompt filtering and safe response generation to block malicious instructions and ensure secure LLM interaction.
- Improved LLM security and reliability by preventing unsafe prompts from executing.

PasswordTensor – Password Strength Analysis System

Python | Machine Learning | Security

- Designed a password strength evaluation system using Python and ML techniques.
- Extracted features including password length, entropy, character diversity, and common patterns.
- Enhanced protection against brute-force and dictionary attacks through scoring heuristics.

Optimized Sentiment Analysis on Social Media

Python | NLP | SVM | VADER

- Built a sentiment classification model for app reviews using VADER and SVM classifier.
- Applied data preprocessing and sampling techniques to improve model performance.

CERTIFICATIONS

- Introduction to Cybersecurity – Cisco Networking Academy ([Link](#))
